

## EXHIBIT A

### Edging Protocol

The use of hard edging material is allowed around planting areas. Cost, installation, and maintenance are all the responsibility of the homeowner.

The following are factors to be considered:

- All edging materials must be of concrete or similar materials used in the neighborhood.
- Height is restricted to one level on level flower beds. Acceptable size is 4" w x 8" l x 4" h.
- Installation of edging materials does not negate the use of required ground cover.
- Edging materials shall be gray or light brown in color.
- Examples of preferred edging is the type at both sides of the Cambridge Crossings entrance. It is available in gray or brown. Another acceptable edging is found at the base of the flagpole; this only comes in gray. There are other examples around the neighborhood. All these are available at Lowe's Home Improvement.
